Fusion Splicer Flex Cables for Fujikura

Replacement flex cables for Fujikura fusion splicers — the red light flex cable for the 12S, 21S, 22S and 27S, and the front and rear flex cables for the 61S, 62S, 62C, 70R and 80S.

A fusion splicer is a precision machine that lives in the field, and its small internal parts take the knocks: the flexible printed cables that link the screens, cameras, lights and boards are folded, vibrated and opened up at every service, and a cracked flex cable can idle an otherwise sound machine with a dead screen, a dark camera view or no illumination in the splice chamber.

Fujikura 12S/21S/22S/27S Red Light Flex Cable

K-FU01

Key Features

- Red light flex cable for Fujikura 12S / 21S / 22S / 27S, plus front and rear flex cables for the 61S / 62S / 62C / 70R / 80S
- The same parts list covers all three families — K-FU01, K-IN01 and K-SU01 are one range, listed in full on each page
- Matched by your splicer model before dispatch: send the model, or a photo of the old part, and the shape is checked first
- Flex cables are model-specific — fold pattern and connector ends differ between machines that look alike
- Ships with your regular tool, blade and electrode orders — spare parts ride along in the same carton

Parts & Compatibility

Product	Replacement flex cables and small parts for fusion splicers
Fujikura — K-FU01	Red light flex cable for 12S / 21S / 22S / 27S; front flex cable and rear flex cable for 61S / 62S / 62C / 70R / 80S
INNO — K-IN01	Display flex cable, straight and bent, for IFS-15 / 15M / 55 / 15T / 55M / 55G and View 3 / 5 / 6 / 7; CCD flex cable; CCD camera module; illumination light for IFS-15 / 15M / 15T / 55 / 55M and View 3 / 5 / 7; red light flex cable for IFS-15 / 15M / 15T / 55 / 55M and View 3 / 5 / 7
Sumitomo — K-SU01	LED flex cable for T-400S (TYPE-400S)
Ordering	By splicer brand, model and part name — or send a photo of the old part for matching

Package Contents

- The part you order ×1 — matched to the splicer model you name

OEM & Private Label

Spare parts can carry your paperwork. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.

Compatibility note: these are aftermarket replacement parts, our models K-FU01, K-IN01 and K-SU01. They are not original Fujikura, INNO or Sumitomo parts. Those names are trademarks of their respective owners; they are used only to describe the splicers these parts fit.
